

ARTIFICIAL CHRISTMAS TREE NATURAL WHITE FROSTED PINE SLIM

A slender version of the Natural White Frosted Pine created for narrow interiors. Its diameter is several centimeters smaller than the classic model. The artificial Christmas tree is characterized by aesthetic appearance and precise finish. The twigs are bristled with pale grey glitter.

MATERIAL

In the production of our Christmas trees we used the highest quality self-extinguishing PVC film, which is resistant to UV rays, humidity and temperature changes. Needles keep their color and shape for a long time.

STORAGE

An artificial Christmas tree from FairyTrees should be stored in a special bag or carton and in a room with an ambient temperature of up to 25°C (77°F), such as is in a basement or a garage.
