

ARTIFICIAL CHRISTMAS TREE NOBLE NORDMANN FIR

The unique Nordmann Noble Fir is a Christmas tree unlike any other. The secret of its exceptionality lies in its unique construction, which allowed it to achieve the extraordinary density and appearance of a real Christmas tree.

MATERIAL

The artificial Christmas tree branches are made of two materials. The PVC needles are long and soft, while the PU needles are rigid and short. Using both materials allowed us to create a premium Christmas tree.

STORAGE

An artificial Christmas tree from FairyTrees should be stored in a special bag or carton and in a room with an ambient temperature of up to 25°C (77°F), such as is in a basement or a garage.
